

# Sola Payments Gateway for Adobe Commerce (Magento 2) Plugin User Guide

## Summary

The Sola Payments plugin allows you to charge credit cards via the Sola Payments gateway.

It enables credit card payments for customers on the storefront and merchants in the Admin portal.

The plugin supports **Authorize Only, Capture, Void, Cancel, and Refund** transactions. The merchant's web servers remain out of the transaction's scope, keeping card data secure and simplifying PCI compliance.

## Features

- Credit Card & Vault Payment method
- **Tokenization vault:** Store cards securely for subscriptions and returning shoppers—no raw PAN ever touches your environment.
- **3-D Secure 2.0 built in:** Step-up authentication meets PSD2/SCA and shifts fraud liability away from you.
- Add Giftcard to Cart Page & Checkout Page.
- **One-tap wallets:** Supports Apple Pay & Google Pay
- Supports **Authorization Only** as well as Authorization and **Capture** processing methods
- Ability to **refund, partially refund, and void** transactions without leaving Magento
- Supports **Split Capture**

- **Country-level payment controls:** Restrict transactions by geography in a single click to meet compliance or business rules.
- **Omni-processor flexibility:** Connect multiple acquirers and let Sola route each transaction for the best uptime and rates.
- Support **Google reCAPTCHA** for Payment method-wise
- **Hosted iFields + SAQ-A scope:** Sensitive card data posts directly to Sola, keeping your Magento server out of PCI scope.

**The Cardknox plugin supports four types of payment methods:**

1. Credit Card
2. Vault Payment Method
3. Google Pay
4. Apple Pay

## Security & compliance

- Sola is a **PCI DSS Level 1** service provider.
- Our iField technology, tokenization, and 3-D Secure workflows keep sensitive data off your stack so you can qualify for the simplest SAQ-A questionnaire.

## 1. Credit Card Payment Method Setup

Navigate to **Admin > Stores > Configuration > Payment Methods > Sola Payment**, which will bring you to the configuration page (see below).

## Sola Payments

## 3. ApplePay Payment Method Setup

### Applepay Domain Register:

Please complete the Apple Pay Domain Registration [here](#) prior to enabling Sola Apple Pay.

The screenshot shows the 'Sola Account Settings' page. On the left, a sidebar lists 'User Settings', 'Portal Settings', 'Gateway Settings' (which is highlighted in blue), 'Key Management', 'Fraud Settings', 'Webhook Settings', and 'Payment Methods'. The main content area is titled 'Gateway Settings' and contains a 'Payment Methods' section. It includes a sub-section for 'Configure Apple Pay' with a 'Register' button. Below this are two more sections: 'Register for Apple Pay with Sola Certificate' with a 'Register' button, and 'Register for Apple Pay using your own Certificate' with a 'Register' button.

## Applepay Configuration:

### Sola Apple Pay

**Important:**

Please complete the Apple Pay Domain Registration [here](#) prior to enabling Sola Apple Pay.

## 4. Payment Method Actions

### 4.1 Capture Action:

If 'Authorize' is selected as the Payment Action in the Sola Payment Gateway module settings (see Payment Actions in the Configuration Options section of this document), select '**Capture Online**' to capture the transaction before submitting the invoice.

Please note that previously voided transactions cannot be captured and will result in an error.

Grand Total	\$1.08
Amount	
<input type="button" value="Capture Online"/>	<input type="button" value="▼"/>
<input type="checkbox"/> Append Comments	
<input type="checkbox"/> Email Copy of Invoice	
<input type="button" value="Submit Invoice"/>	

### 4.2 Void

Use 'Void' to cancel transactions on orders that have not yet been invoiced. This is only available if 'Authorize' is selected as the Payment Action in the Cardknox module settings (see Payment Actions in the Configuration Options section of this document). Once an order has been invoiced, use 'Credit Memo' to refund the transaction.

Please note that 'Void' cancels the credit card transaction but does not cancel the order. To cancel the order as well, see the Cancel section below.

## 4.3 Cancel

Use Cancel to void an uncaptured transaction and cancel the associated order.

## 4.4 Credit Memo

Issue a Credit Memo to refund an order that has already been invoiced.

Mar 10, 2025 7:11:39 AM | Closed | Customer **Not Notified**  
We refunded \$1.08 online. Transaction ID: "10265037517-refund"

## Retrieve Sola Reference #:

Sola transaction reference numbers can be found in the Transaction History section of any order page and are referred to as 'Transaction ID'.

This can be useful when viewing your transactions on the Sola Payment Gateway portal or when contacting Sola Support regarding specific transactions.
